

COLLECTIBLE MIRROR-SCULPTURE

CI-3

WHERE REFLECTION BECOMES FORM

A monumental mirror-sculpture in high-polished aluminium, where light, movement and reflection become part of the architecture.

C1-3

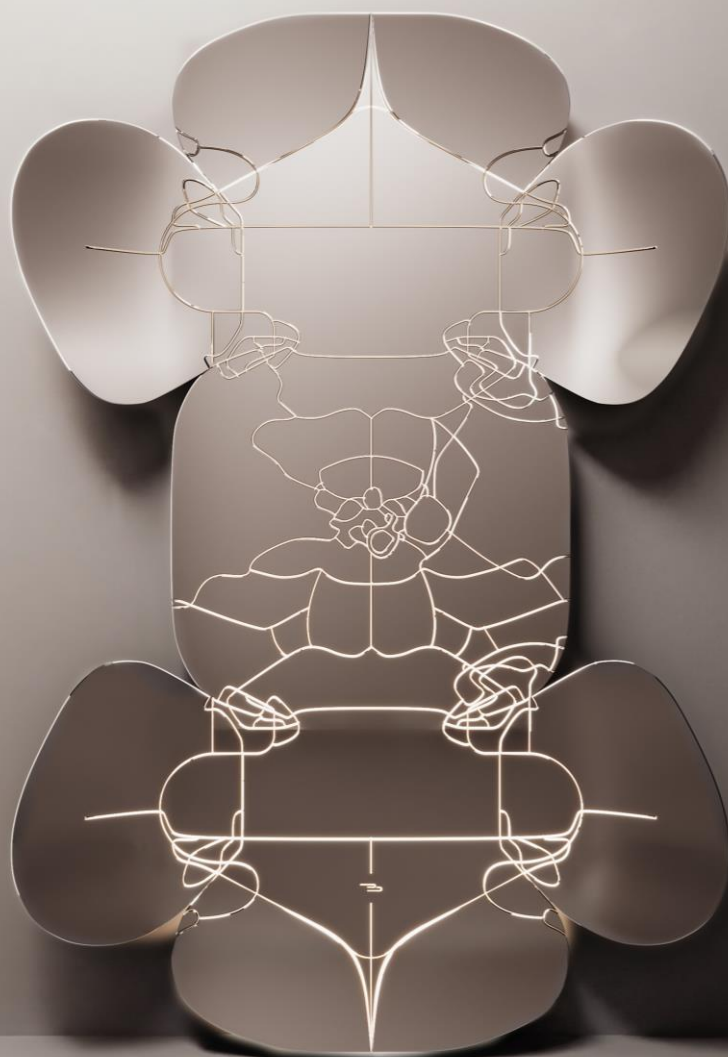

C1-3 explores the moment at which a mirror ceases to be a passive surface and becomes a sculptural presence.

Its fluid aluminium form is shaped and polished to an exceptional finish, allowing light, movement and the surrounding interior to travel continuously across its surface. The composition transforms with every viewpoint and every change in illumination.

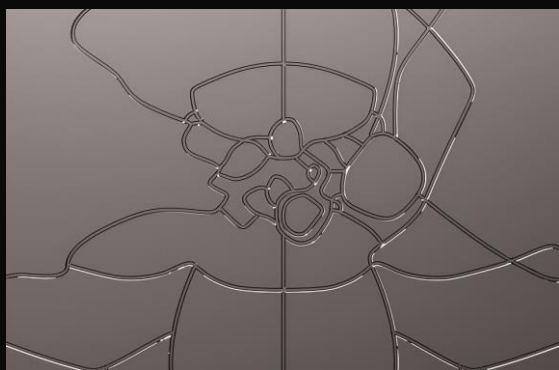

“Reflection, sculpted into presence.”

**FRONT VIEW**

A monumental mirror-sculpture defined by a fluid, precisely resolved silhouette.

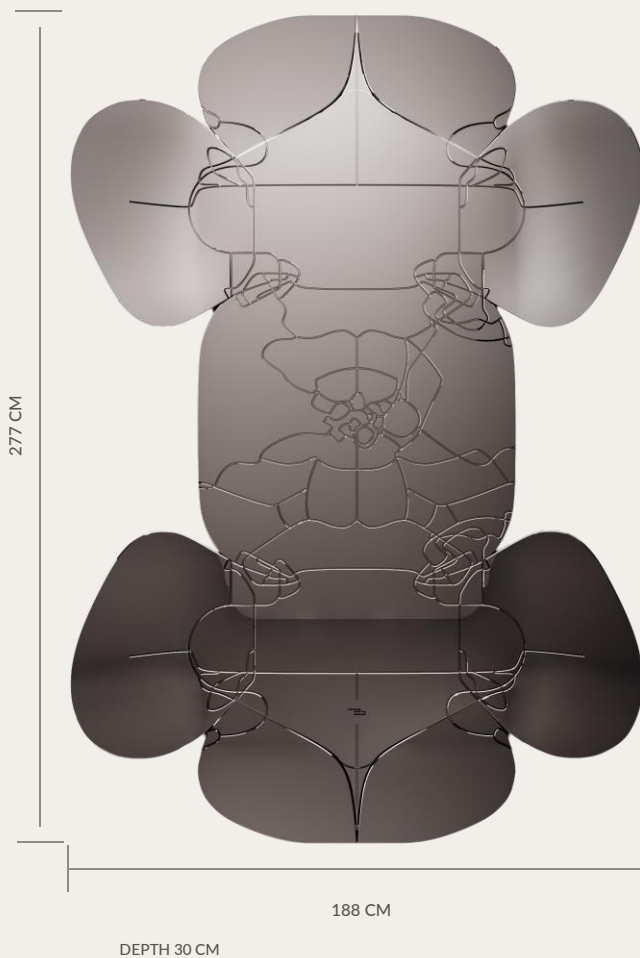

**THE ILLUMINATION**

Where Reflection Becomes Form

An integrated programmable lighting system traces the sculptural outline, introducing a controlled field of light around the piece. From subtle ambient presence to a more dramatic architectural expression, illumination becomes part of the form.
